

Grade: 6

Reading Worksheet

Units: 7/8/9

A) Read the following text:

Cars are amazing machines that help us get from one place to another. They have engines that make them go, like the ones in your toy cars but much bigger! Some cars use gasoline, like what you put in your family's car, while others use electricity, which is cleaner and better for the environment. Cars have special features to keep us safe. They have things like airbags that inflate if there is an accident to protect us, and anti-lock brakes that help us stop safely.

These features make sure we stay safe while we're driving. Sometimes, cars can hurt the environment by making the air dirty. But there are new cars called electric cars that do not make the air dirty at all! They run on electricity, like your toys that you charge up. Cars are super important because they help us go to school, visit friends, and even go on fun trips with our families. They make it easy for us to explore new places and do exciting things!

B) Answer the following questions:

1- What are the two main ways cars can get their power?

- | | |
|---------------------------|-------------------------|
| a) Gasoline and batteries | b) Wind and solar power |
| c) Water and air | d) Food and drinks |

2- What are some safety features in cars mentioned in the passage?

- | | |
|-----------------------------------|----------------------------------|
| a) Seat belts and steering wheels | b) Airbags and anti-lock brakes |
| c) Sunglasses and snacks | d) Music players and cup holders |

3- How can cars sometimes be bad for the environment?

- | | |
|----------------------------|------------------------------|
| a) They make the air dirty | b) They make the air cleaner |
| c) They help plants grow | d) They make the sky bluer |

4- Why are cars important, according to the passage?

- | | |
|---------------------------------------|---|
| a) They make it harder to go places | b) They help us go to school and have fun |
| c) They are only for grown-ups to use | d) They are not important at all |
